

CODING

Coding is a creative activity that students from any discipline can engage in. It helps to build computational thinking, develop problem solving skills, improve critical thinking and exposure to real life situations to solve problems in various realms.

The idea is also to simplify the coding learning experience by nurturing design thinking, logical flow of ideas and apply this across the disciplines. The foundations laid in the early years will help the students to build the competencies in the area of AI, data sciences and other disciplines.

Therefore, CBSE has introduced 'Coding' as a skill module of 12 hours duration in classes VI-VIII from the session 2021-2022 onwards.

In DPSM, the block coding programme is successfully introduced to Grade 6 students to enrich their technological learning process. The young programmers are enthusiastically learning the new concepts with great interest.
